

Build a City

2 Players

1 die

Unifix Cubes

Game Board

Print and laminate the game board.

- Players decide which column of the game board will be theirs to build on.
- Players take turns rolling one die.
- For each roll, a player builds a tower of unifix cubes on a square in their column of the game board using as many cubes as the number on the die.
- After 6 rolls each, the players count up all of the unifix cubes used for their “city”.
- Then the players use the spinner to see if the higher or lower number of cubes WINS!

Variation: Use 2 dice for taller towers and greater totals
